Campervans and RVs

The safety of our customers is of the utmost importance to Apollo. Therefore we have developed a best practice approach to Child Restraints. We aim for the best safety (not just recommended levels) for our clients' children.

Clients can rent Child Restraints (must be pre-booked) from Apollo for \$30 per rental. It is the client's responsibility to fit them to the vehicle (our branch staff are legally unable to fit them or advise on how they should be fitted) and we recommend the following guidelines below:

Capacity									
	Endeavour Camper	Euro Camper & Euro Star	Euro Deluxe	Outback Camper	Hitop Camper*	Euro Tourer	Trailfinder	Adventure Camper	Euro Slider

*Hitop: A child travelling in the Hitop must be a minimum of 8 years old and must use the 3 point seatbelt when travelling. Only 1 child is allowed to travel in the Hitop at one time. The upper bed of the Hitop has a maximum weight capacity of 50kgs. Maximum weight for the top bunk in the Endeavour Camper and Trailfinder Camper is 200kg. It is not recommended that any person above these weights use these beds.

	Baby Seats	Booster Seats

Age	0 to 6 months	4 to 7 years
Length	up to 70 cm	up to 140cm

No child restraints are required for children over min. 140 cm, OR over min. 26 kg OR 8 years of age (on average)

PLEASE NOTE: All child restraints used in Australia must comply with current Australian standards. Most overseas child restraints do not comply with these standards and cannot legally be used in Australia. This includes but is not limited to restraints from countries such as the UK and USA.
